PROFESSIONAL SUMMARY

Business Analyst and service delivery professional experienced in core banking and digital transformation programmes across the UAE and Bahrain, spanning **FCUBS 14.7, OBDX, OBIEE, KYC, FCCM, and SWIFT**. Produces **BRDs, FRDs, gap analyses, integration maps, and UAT plans** while aligning business, compliance, engineering, regulators, and global vendors. Graduate researcher in **trustworthy and interpretable AI, cybersecurity, and applied AI**, combining regulated-industry delivery with hands-on AI research.

PROFESSIONAL EXPERIENCE

Graduate Research Assistant

Seongnam, South Korea

03/2026 – Present

Gachon University

- Conducting graduate research at the intersection of **artificial intelligence, cybersecurity, and trustworthy AI**, including literature review, experimental design, and evaluation of research directions.
- Supporting the development and documentation of research prototypes, technical findings, and publication-oriented work.

Officer – IT Service Delivery (Project Manager / Business Analyst)

Lahore, Pakistan

10/2024 – 17/08/2026

MCB Bank Ltd.

- **AI Integration BRD – OBDX Pakistan:** Led the end-to-end BRD for embedding AI into digital banking channels, covering compliance, data governance, and integration architecture.
- **FCUBS 14.7 Upgrades – UAE & Bahrain:** Delivered requirements, gap analysis, and integration mapping for a 10K+ user migration with < 12h downtime and integrations spanning Treasury, Safewatch, and Payment Safe.
- **OBDX, OBIEE & KYC – UAE:** Delivered digital banking workflows and vendor UAT; automated 30+ KYC, GL, and regulatory reports; and designed approval and risk-scoring workflows aligned with Central Bank UAE requirements.
- **FCCM / Regulatory Delivery:** Produced AML/CFT integration specifications and UAT scenarios, and managed Bahrain IBAN and compliance changes aligned with CBB directives.
- **Stakeholder & Vendor Management:** Led workshops, resolved dependencies, and aligned business, regulators, Deloitte UAE, and vendors including Oracle, IBM, Silverlake, Unicrew, and E-Ocean.

Associate Software Engineer

Lahore, Pakistan

06/2024 – 08/2024

Yottacom

- Fine-tuned generative AI models using **Stable Diffusion, LoRA, and DreamBooth**, preparing datasets and adapting model weights for domain-specific image generation.
- Developed **RAG and multimodal pipelines** using FAISS and OCR, and supported distributed machine-learning workloads with **Ray, GKE, and Azure**.

SELECTED PUBLICATIONS & PRESENTATIONS

- DermNet: Integrative CNN-ViT Architecture for Bias Mitigation in Dermatological Diagnostics** — *Scientific Reports (Nature)*, 2026
- Automated EARS-Based Requirements Generation with Lightweight Large Language Models** — *IEEE ICTMOD 2025*, 2025
- Extraction of Equations from Model Weights** — *MeMo Workshop Presentation*

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad – Lahore Campus

08/2020 – 06/2024

CGPA: 3.41/4.00

Technical & Delivery Expertise

Delivery: Requirements Engineering | BRD/FRD | Gap Analysis | UAT | Integration Mapping | Stakeholder & Vendor Management
Banking: FCUBS 14.7 | OBDX | OBIEE | FCCM | KYC | SWIFT | AML/CFT
Enterprise AI: RAG | FAISS | Stable Diffusion | LoRA | DreamBooth | Ray | GKE | Azure
Research: Trustworthy AI | Healthcare | CyberSecurity | Interpretable AI

Certifications

McKinsey Forward Program | Google Project Management | Team Synthesis Leadership Development Bootcamp | AI & ML Specialization | Harvard CS50X | Microsoft Azure AI Fundamentals (AI-900)
